ILYES AHMED

UNITY GAME PROGRAMMER | VR/XR DEVELOPER

Hammam Sousse, Tunisia | +216 29 246 536 | ilyesahmed6@gmail.com | linkedin.com/in/ilyesahmed
Portfolio: ilyesahmed6.wixsite.com/portofolio | Playable WebGL Demo: silyesss.itch.io/portfolio

PROFESSIONAL SUMMARY

Unity developer and game designer with 4+ years shipping gameplay systems and VR/XR experiences in C#. Built multiplayer, gesture-recognition, and full-backend systems for cultural, medical, and mobile projects, plus indie titles taken from prototype through deployment. Seeking Unity Development or Game Design roles, remote or onsite, worldwide.

TECHNICAL SKILLS

Engine & Languages: Unity 3D (2D & 3D), C#, Object-Oriented Programming (OOP), C++
VR/XR Development: Oculus, XR Interaction Toolkit, hand tracking, gesture recognition (PDollar), WebGL
Gameplay & Systems: Gameplay mechanics, game physics, finite state machines, AI behavior, character controllers, UI/UX systems
Production & Backend: Unity Netcode for GameObjects, PostgreSQL, Firebase, Supabase, Strapi, REST APIs & auth, version control, agile workflows

SELECTED PROJECTS

Sousse Digital Twin — *Multiplayer historical VR simulation*

- Rebuilt the ancient city of Sousse (800 AC–1956 AC) as an explorable multiplayer Unity VR simulation with in-world voice chat, exhibited at the First Arab Forum on Metaverse and the Future of Creative Cultural Industries.

DragonSlayer VR — *Physiotherapy-driven combat VR experience*

- Built a state-machine-driven combat system where players cast spells via shoulder/arm gestures designed with physiotherapists to treat movement impairments, recognized via the PDollar Gesture Recognizer.

Capture the Flag — *Mobile multiplayer game with full backend*

- Built real-time multiplayer with Unity Netcode for GameObjects, backed by a Strapi/PostgreSQL server handling accounts, email-confirmation and password-reset flows (via Gmail SMTP app passwords).

PROFESSIONAL EXPERIENCE

Unity Instructor *Sep 2023 – Present*
ISBAS — Sousse, Tunisia

- Designed and delivered a Unity development curriculum covering C# scripting, gameplay mechanics, physics, and UI to 12 students per cohort, with coursework focused on turning engine concepts into prototypes.

Game Developer *Sep 2022 – Sep 2024*
3DWAVE — Sousse, Tunisia

- Built and shipped gameplay systems, UI, and core mechanics in Unity/C# across 15 indie and VR titles, taking each from prototype through deployment as part of a small cross-functional team.
- Re-engineered performance-critical gameplay algorithms, reducing frame time by around 25%, and integrated 3D models/animations from the art team into live gameplay scenes.

Technical Consultant *Oct 2021 – Aug 2022*
ZUM-IT — Tunis, Tunisia

- Translated client business processes into software recommendations across 4 engagements and delivered training to support adoption..

EDUCATION

Engineering Degree in Computer Science — *University of Carthage, ENSTAB, Tunis* *Sep 2017 – Jul 2021*
Preparatory Studies in Engineering — *University of Monastir, IPEIM* *Sep 2015 – Jul 2017*
